

# Tasso-M20

## Click. Collect. Done!

Blood collection made easier than ever.

### Improve the Patient Experience

Collecting samples with Tasso-M20 is convenient and virtually painless for patients.

### Seamlessly Integrate with Clinical Trials

Tasso-M20 fits into your existing clinical trial workflow with the flexibility to support remote or in-clinic collection.

### Accurately Measure Blood Analytes

Tasso-M20 collects volumetrically controlled dried blood samples that are clinical grade and stable for shipping.

## Collection Process

1 Patient receives a kit containing a Tasso-M20 and all the supplies for sample collection.

2 Patient collects samples at home without the need for access to a laboratory or mobile phlebotomist.

3 Patient places sample in packaging appropriate for blood transport under local regulations.

4 Patient returns sample for analysis via logistics method of choice.

## Technical Specifications

<b>Device Indications for Use:</b>	The Tasso-M20 is used to collect, store, and transport capillary blood for testing in a centralized laboratory. It is to be used in non-clinical settings for use in adult populations.
<b>Sample Type:</b>	Whole dried blood
<b>Blood Collection Volume:</b>	4 samples of 17.5µL CV of <5%
<b>Blood Collection Substrate:</b>	Tasso Volumetric Tip
<b>Collection Time:</b>	5 minutes
<b>Drying Requirement:</b>	Separate drying step not required. Sample can be shipped immediately after collection.
<b>Kit Dimensions:</b>	17x10x3.5cm (6.75x4x1.4in)
<b>Kit Weight:</b>	100g (3.4oz)
<b>Shipping:</b>	Kits may be delivered with custom return labels with no patient identification. Sample ships via standard post.
<b>Device Storage:</b>	18-28° C (64.4-82.4° F)
<b>Device Transport:</b>	Transport at 25-85% RH
<b>Shelf Life:</b>	12 months
<b>Availability:</b>	CE Marked

## Safety Specifications

<b>Biocompatibility:</b>	ANSI AAMI ISO 10993
<b>Sterilization:</b>	ANSI AAMI ISO 11137 ANSI AAMI ISO 11607
